We will have two kinds of users in this software:

As management user, I should be able to:

1. Create, Read, Update and Delete (CRUD) Members in Society.
2. Update Monthly maintenance amount.
3. See room tenants data.
4. See monthly paid & unpaid tenants.
5. Send warning email with payment linkl for non payment of maintenance at a certain date by clicking a button / Cron Job.
6. Automatic sending of payment link via email via clicking button or Cron Job.
7. Get notifications for every payment recieved.
8. Login, Logout, Reset password by email.

As tenant user, I should be able to:

1. See past Transactions.
2. Pay outstanding amount or a part of it via payment link sent to me via email or by clicking pay now button in dashboard.
3. Login, Logout and Reset password by email.

Other Services which will be configured:

1. Razorpay / Cashfree/ Instamojo payment gateway.
2. SMS/Email API for notifications.

Pricing:

Rs. 15,000 → Payment Slabs => 50% before starting | 50% after completion.
This does not include any server, domain and API costs which we may or may not need.
